

Engine Cleaning

GIVE FRESH OIL A FRESH START

SAFE AND EFFECTIVE

GREAT FOR GDI ENGINES

The Problem

Dirt, acids, heat, fuel, water due to condensation, and other factors cause sludge to form in an engine. This makes oil work harder to protect an engine properly and often results in low oil levels. Combined with today's extended drain intervals this makes vehicle maintenance more critical than ever.

The Solution

Engine Scrub is an engine's best friend! Safe, gentle, easy, and effective, it's the most cost efficient way to dissolve soft sludge and prepare your engine for the fresh oil. Want the best your car can give you?

Make Engine Scrub a part of your preventative maintenance routine!

Product	Size	Part #	Case Qty
Engine Prep	8 Oz	TM2745	12
Oil System Cleaner	16 Oz	TM5646	12
Engine Flush	1 Gallon	TM7326	4

Directions for 8oz/16oz

- Add Engine Scrub to old oil
- Run engine for 5 minutes
- Drain
- Proceed with oil change service to include oil filter change

*ASK US HOW TM2745 can be used in place of the Gallon Service
