

HEADLIGHT RESTORATION

ONLY TAKES 15 MINUTES

FAST DRYING - NO UV LIGHT

EASY APPLICATION

The Problem

Most headlights today are made of plastic with a protective coating that when exposed to prolonged periods of sunlight begin to break down causing yellowing or clouding. Signs of deterioration can begin when headlights are only three years old greatly reducing visibility, especially during nighttime driving.

The Solution

Throttle Muscle's Headlight Restoration service is the answer for today's aftermarket operators looking for a fast, easy, and manageable service with excellent results. Everything but the spray bottle for water is included in each kit and results are guaranteed for up to a year.

INCLUDED IN EACH KIT:

- Alcohol Wipes (4)
- Masking Tape w/ Plastic Drape
- 320, 600, 1000 Grit Sandpaper
- Lint Free Towel
- 2oz UV Ray Protectant Sealant Spray

BEFORE

AFTER

SERVICE OVERVIEW

- Clean, tape and drape both headlights
- Wet sand using 320, 600, and 1000 grit sandpaper
- Completely clean and dry headlights
- Seal both headlights using UV Ray Protective Sealant Spray
